Powder Coating for Interior Applications
Actual Powder Coated Samples

Design meets functionality

Since the beginning of time, people are fascinated by attractive exteriors, the aesthetic shell that surrounds an object. Just as we protect our skin to keep it smooth and radiant, we also have to protect the finish of an object: From scratches and bumps. From impurities and chemicals. From high humidity and direct irradiation from the sun. From everything that might cause damage.

TIGER Drylac® powder coatings for interior design elements provide great freedom for design coupled with highly functional surfaces and create unmistakable design objects with long-term retention of value.
